Subject: Williams Olefins Plant- Last permit

Attached is the permit that was issued in 2012. It was a PSD for GHG only.

The expansion was for a capacity annual increase in ethylene production from 1.45 to 1.95 billion pounds.

New Equipment consisted of 2 new cracking heaters with SCR and associated equipment.
Replacement of the existing elevated Olefin Plant flare with a low profile multihead system designed to accommodate the increased thruput.
Replacement of all the pressure relief valves into the proposed Olefin Plant.
Modified the existing amine system.
